MANUAL WINCH
ELEVATING WORK PLATFORM
puts you where the work is

The manual winch Maxi-Lift is built tough to handle the day-to-day demands of industrial and commercial use. Getting those overhead jobs done requires a lift that is dependable - one that won’t let you down.

Designed to be handled and operated by one worker, it rolls easily from job to job and fits through a standard doorway without alteration or disassembly.

The manual winch system is operated from ground level and elevates the platform to the desired working height. With the outriggers set, the operator climbs the access ladder to the platform. The cable lift system includes an emergency stop fall arrest device. Heavy duty and rigid in construction, it meets the strength and dimensional requirements of ANSI standard A92.3-1990.

**SOLID FEATURES:**
- Exclusive Cotterman built manual hand winch features a heavy duty brake and stop dog.
- Large 25 x 29” skid-resistant platform with toeboards and tubular guardrails.
- Smooth rolling 8” phenolic casters for easy movement of The Maxi-Lift from job to job.
- The compact design allows easy movement of the unit through standard doors.

**ACCESSORIES**
- **FLUORESCENT TUBE CADDY:** The caddy attaches easily to the side of the platform and holds a box of 4 ft. or 8 ft. tubes.
- **HINGED TOOL TRAY:** A handy 10” workshelf that secures to the front or sides of platform rails. Keeps tools within easy reach without restricting platform space.
